
Emergency PHP2Shell Engineering Services

[CVE-2026-109618](#) / [CVE-2026-109619](#)

Six independently scoped services for assessment, patching, forensic review, containment and recovery. Engineering delivery only. No V8Y software platform purchase required.

SIX STANDALONE SERVICE PACKAGES

P01 | PHP2Shell Exposure Assessment

Review identified PHP versions, vendor fixes and dependencies. Deliver an Exposure Assessment Report and prioritized next actions.

P02 | PHP2Shell Patch & Verification

Apply approved security updates and test agreed functions. Deliver a Patch Completion & Verification Report.

P03 | PHP2Shell Forensic Assessment

Review bounded, authorized evidence for possible exploitation. Deliver a Forensic Findings & Evidence Report with limitations.

P04 | PHP2Shell Patch + Forensic Assessment

Combine authorized evidence review, approved patching and verification. Deliver a Combined Remediation & Findings Report.

P05 | PHP2Shell Emergency Containment

Apply approved temporary exposure-reduction measures. Deliver a Containment Action & Residual Risk Report.

P06 | PHP2Shell System Recovery & Restoration

Restore defined services using approved recovery resources. Deliver an Operational Restoration Report.

FOR GOVERNMENT ACQUISITIONS

Each package may be requested on its own. V8Y provides a defined statement of work, proposed performance terms, deliverables, acceptance criteria and quotation for authorized government or prime-contractor procurement.

SERVICE BOUNDARIES

Forensic findings depend on available evidence. Temporary containment does not replace patching. Patching and restoration do not establish absence of compromise. No work begins without appropriate contracting, access and change authorization.

CONTRACTING INFORMATION

V8Y Technologies Corp.
UEI: SRU8RAZ94FJ3
CAGE: 22D94
